

Robust jaw clamps are used for highly stressed joints or durable hoses. The curved edges of the tape prevent damaged hoses.

The addition of molybdenum makes the steel resistant to oxygen, even in the weld area. The clamp material is resistant to all types of hydrochloric, organic and inorganic acids. It is used in places with maximum demands on corrosion resistance.

- **Material:** chrome-nickel molybdenum steel

Selected variant

Product name	Hose clamp Robust W5
Product code	0
Diameter (mm)	227-239
width	26
