

The grease fitting caps snap tightly into the hole. This helps to remove dirt, sand and moisture and extends the life of the parts. The fittings stay clean and there is no need to wipe them down before each lubrication.

The integrated retaining ring keeps the cap securely attached to the fitting. The caps can also be used to mask and protect fittings during painting, spraying and transport.

- **Material:** LDPE
- **Color:** red

Selected variant

Product name	Covers for grease couplings, LDPE, red
Product code	29918
Diameter D (mm)	7.7
Length L (mm)	24.3
Height H (mm)	5.8
Diameter d1 (mm)	13
